Implement a program in C to find the sum of digits of a number using a function.

Code-
```c
#include <stdio.h>
int sum(int);
int main()
{
 int n;
 printf("Write a no.");
 scanf("%d",&n);
 sum(n);
 return 0;
}

int sum(int t)
{
int s=0;
while(t>0)
{
 s=s+t%10;
 t=t/10;
}
printf("Sum of digits=%d",s);
return 0;
}
```

Input-
Write a no.125

Output-
Sum of digits=8
